

VISHWAJIT MALL

Full Stack Developer | Python Backend Engineer | AI-Augmented Applications

vishwajitmall50@gmail.com | +91 8920352115 | github.com/vishwajitvm | New Delhi, India

SUMMARY

Full stack developer with 4+ years of experience designing and shipping end-to-end web applications across Python, Node.js, and PHP Laravel stacks. Skilled in RESTful API architecture, relational and document database design, role-based access control, and multi-tenant backend systems. Increasingly focused on applied AI — built multiple production-grade FastAPI backends integrating LLM orchestration, Retrieval-Augmented Generation, and background job processing. Published an open-source Python logging library on PyPI. Comfortable working across the full stack, from database schema to frontend delivery.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, PHP, SQL

Backend Development: FastAPI, Node.js, Express.js, Laravel (PHP), REST API Design, GraphQL, Celery Background Workers

AI / LLM Engineering: LangChain, LangGraph, Retrieval-Augmented Generation (RAG), Multi-Provider LLM Routing, Prompt Engineering, AI Agents

Frontend: React, Vue.js, React Native, HTML5, CSS3, Bootstrap, jQuery

Databases & Vector Stores: PostgreSQL, MongoDB, MySQL, Qdrant, Redis

Authentication & Security: JWT, OAuth / OIDC (Keycloak), Role-Based Access Control (RBAC)

Cloud & DevOps: AWS S3, AWS RDS, AWS Amplify, Docker, Docker Compose, Nginx, GitHub Actions (CI/CD)

Methodologies: Agile, Scrum, Microservices Design

Tools & Project Management: Git, GitHub, JIRA, Azure DevOps (Boards, Sprint & Work Item Tracking)

EXPERIENCE

Full Stack Developer — Bee Logical Software Solutions

Pune, India · Nov 2022 – Jun 2026

- Served as a core developer delivering production platforms end-to-end, including SmartHR (AI-powered interview automation), SetBot (multi-role property booking platform), and Bella Canvas (3D product customization & e-commerce) — technical details under Projects below.
- Received the company's Outstanding Performance Award (November 2024) for engineering contributions and team collaboration.

Software Developer — WebReinvent

New Delhi, India · Jul 2022 – Oct 2022

Full Stack Developer — BluBrandz Technologies Pvt Ltd

New Delhi, India · Aug 2021 – Jun 2022

- Built a hospital management system (Angle Fertility) to digitize patient records, appointment booking, and clinical workflows for healthcare staff.
- Developed an event management system (Aragma — House Party Management) for planning events and tracking participants, expenditures, and staff records.
- Built an equipment management system (Unicorn Equipments) with a Laravel-based admin dashboard for tracking and maintaining listed machinery.

PROJECTS

Tallyko — Multi-Tenant Restaurant / Retail POS Platform

A point-of-sale platform that lets multiple restaurants and retail stores independently manage billing, inventory, and kitchen orders from one shared system.

FastAPI · PostgreSQL · Redis · React Native

Independent Project · github.com/vishwajitvm/Tallyko

- Architected a multi-tenant FastAPI backend supporting both shared and dedicated-database tenancy models with Redis-cached tenant resolution.
- Built JWT authentication, Redis-backed sliding-window rate limiting, and a structured global exception-handling layer.
- Designed an offline-first mobile client (React Native + WatermelonDB) covering billing, inventory, kitchen display, and CRM workflows.

TenantMind-AI — Multi-Tenant AI Property Management Platform

An AI platform that lets property-management teams query lease documents in natural language and automate tenant workflows, with each organization's data kept isolated.

[FastAPI](#) · [Keycloak](#) · [MongoDB](#) · [Qdrant](#) · [Celery](#) · [Docker](#)

Independent Project · github.com/vishwajitvm/TenantMind-AI

- Architected a multi-tenant FastAPI backend with Keycloak OpenID Connect authentication.
- Built a multi-provider LLM gateway (Gemini, Groq, OpenRouter, Ollama) with automatic fallback and per-request usage logging.
- Implemented a RAG endpoint using per-tenant Qdrant vector collections, backed by Celery/Redis workers and a Prometheus/Grafana/Loki observability stack.

SetBot — Property Management and Booking Platform

A booking platform for studios, hostels, restaurants, and shops, letting partners list properties and customers book based on live availability.

[Node.js](#) · [Express.js](#) · [MySQL](#) · [JWT](#) · [TypeScript](#)

Built at Bee Logical Software Solutions

- Architected RESTful APIs for property lifecycle management, booking workflows, and administrative reporting.
- Implemented JWT-based authentication and role-based access control across Admin, Partner, Manager, and Customer roles.
- Built a booking engine with real-time slot validation and offer application logic under concurrent requests.

Bella Canvas — 3D Product Customization & E-Commerce Platform

A 3D configurator that lets sportswear brands and customers design and personalize jerseys and uniforms, integrated directly into a Shopify storefront.

[PHP Laravel](#) · [Vue.js](#) · [AWS RDS \(MySQL\)](#) · [AWS S3](#) · [Shopify API](#)

Built at Bee Logical Software Solutions

- Led backend architecture and data modeling for a multi-stage design lifecycle (BASE → TEMPLATE → SESSION → PRODUCT → ITEM).
- Built the full REST API surface for design, panel, and asset management, plus Shopify product and order synchronization.
- Engineered an AWS S3 asset pipeline serving UV-mapped texture files for real-time 3D rendering.

Smarthr — AI Interview Platform

An AI system that conducts and scores first-round candidate interviews automatically, reducing manual recruiter screening workload.

[Python](#) · [LangChain](#) · [LangGraph](#) · [RAG](#) · [AI Agents](#)

Built at Bee Logical Software Solutions

- Architected an AI-driven interview pipeline using LangChain and LangGraph for stateful, multi-turn conversation management.
- Built RAG pipelines and agent-based evaluation logic to generate role-specific questions and structured candidate scoring reports.

PolicyBot — Retrieval-Augmented Generation (RAG) Q&A Platform

A Q&A system that answers natural-language questions about internal documents by retrieving relevant passages and citing sources.

[FastAPI](#) · [MongoDB](#) · [Qdrant](#)

Independent Project · github.com/vishwajitvm/PolicyBot

- Built a RAG query pipeline combining vector and keyword retrieval with freshness-aware resolution, citations, and confidence scoring.

MahaEseva.com — Online Rent Agreement Platform

A government-compliant platform for generating, managing, and digitally signing rental agreements across India.

[PHP Laravel](#) · [MySQL](#) · [Bootstrap](#)

Built at Bee Logical Software Solutions

- Built admin and end-user portals for generating, managing, and digitally signing rental agreements, with integrated payment processing and biometric verification.

OPEN SOURCE

TraceNest — Python Logging SDK

A logging library for Python/FastAPI applications that handles log rotation, retention, and automatic secret-masking, published for other developers to use.

Independent / Open Source · pypi.org/project/tracenest · github.com/vishwajitvm/TraceNest

- Designed and published a zero-dependency, thread-safe logging library with automatic rotation, retention enforcement, FastAPI middleware, and a built-in log-viewer UI.
